# Summary:

Key bug fixes, January 26th  
2022

FEATURE NAME	Customer
<b>Scrolling through large pools</b> - a 'no rows to show' message is solved and customers can scroll further with no need to log out	All
<b>Event Custom Fields</b> - are now responsive to screen size	All
<b>Email campaign Template</b> - when sending out the campaign, the footer's original colour is now being saved	All
<b>User List</b> - The Users list in the Settings page no longer crashes or becomes unresponsive due to the high number of users	All
<b>Email template</b> - when a template is saved and then reopened, the font styling is no longer removed and it appears correctly. This is also true for when a code is dropped straight into a new campaign via the composer.	All
<b>Conversation flow data</b> in all columns are no longer showing as 0 to the affected users.	All
